WOODEN SADDLE

Wooden saddles are specially designed supports used to hold and secure cylindrical or round equipment during storage and transportation. They prevent rolling, distribute the load and protect the product from damage.

Pipe Saddle

Used for pipes and tubes to prevent movement during transportation.

Tank Saddle

Designed to support storage tanks and vessels safely during transportation.

Pressure Vessel Saddle

Heavy-duty saddles for pressure vessels and industrial equipment.

Cable Drum Saddle

Supports cable drums and reels, ensuring safe handling and transport.

BLOCK SADDLE

Block saddles are solid wooden supports used for heavier loads and high-impact transportation. They provide maximum stability and load distribution.

Single Block Saddle

Single piece block saddle for light to medium cylindrical equipment.

Double Saddle

Provides extra stability for larger diameter pipes and heavy cylinders.

Heavy Duty Saddle

Used for heavy and high-value equipment requiring maximum strength and safety.

Custom Saddle

Custom designed as per equipment size, shape and weight requirements.

MATERE PACKAGING INDUSTRIES

PACK WITH CONFIDENCE,
SHIP WITH CERTAINTY.

CUSTOMIZED WOODEN STRUCTURES

Wooden Skids

Strong wooden platforms that make it easy to slide, push, or lift heavy equipment using a forklift or crane.

Wooden Base Frames

Solid wooden foundations that keep heavy machinery steady and safely balanced while it is being moved or kept in storage.

Wooden Support Frames

Custom wooden braces that help balance and support awkwardly shaped items so they don't tip over or break.

Machine Base Structures

Exact-fit wooden bases made specifically for delicate industrial machines to keep them locked securely in place without shifting.

Wooden Lifting Frames

Special wooden frames with built-in hook spots so you can safely pick up heavy or fragile items with a crane.

Wooden Assembly & Storage Frames

Wooden racks and frames built to hold parts safely in place while they are being put together in a factory or stored away for a long time.

Wooden Dunnage & Spacer Blocks

Custom-sized wooden blocks and wedges used to fill empty spaces in a crate to stop cargo from bumping around or sliding during a trip.

Custom Timber Fabrication

Specially designed wooden packaging built exactly to the specific size and weight limits needed for your unique items.

Product-Specific Wooden Fixtures

Custom wooden holders carved to perfectly hug the shape of one specific item, acting like a custom-fit case for top-tier protection.

Special Purpose Wooden Structures

Completely unique, one-of-a-kind wooden setups built specifically for very strange, highly unusual, or extra-heavy loads.

Customized Wooden Structures are tailored timber frameworks engineered to meet specific dimensions, load capacities, and industrial handling requirements.

They provide essential support, protection, and stability for heavy machinery, specialized equipment, and unique cargo during manufacturing, storage, and transport.

Matere Packaging Industries

Our Corrugated Packaging Division provides customized corrugated packaging solutions suitable for various industrial applications

OUR PRODUCTS:

- Corrugated Boxes
- Heavy-Duty Corrugated Boxes
- Industrial Cartons
- Customized Corrugated Packaging Solutions

2.CORRUGATED PACKAGING DIVISION

- Industrial Corrugated Boxes
- Export Corrugated Boxes

- High-Strength Corrugated Packaging
- Multi-Wall Corrugated Boxes

CUSTOMIZED CORRUGATED SOLUTIONS

- Custom Printed Boxes
- Custom Die-Cut Packaging
- Product-Specific Inserts
- E-commerce Packaging
- Industrial Custom Packaging

VCI PACKING

Special packaging that releases an invisible vapor to coat metal parts, blocking moisture and stopping them from rusting.

VACCUM PACKAGING

Sucking all the air out of a package before sealing it tightly, which keeps moisture out and protects the enclosed items from damage like rust or spoiling.

FUMIGATION SERVICES ISPM-15

A professional pest-control treatment for export containers and industrial materials to meet international shipping rules, ensuring no bugs travel with your cargo.

LASHING & CHOKING

Using strong straps, tight belts, and wooden wedges to tie down and block heavy cargo so it stays completely locked in place while traveling.

TRANSPORTATION

Safe and dependable hauling services designed specifically to move large, heavy industrial cargo to its final destination securely and on time.

HEAT TREATMENT ISPM 15

Baking wooden pallets, boxes, and crates at high temperatures to meet global shipping standards, kill pests, and ensure the wood lasts a long time.

SERVICES WE OFFER

PALLET CHEMICAL TREATMENT

We offer safe, water-based chemical treatments to protect wooden pallets from insects, moisture, and decay-causing fungi

PALLETIZATION SERVICES

We provide a variety of efficient palletization and packing services designed for the safe and rapid loading, unloading, and transport of your cargo.

SKID PACKING

We offer customized skid packing solutions that securely support and stabilize your goods for easy mechanical handling and safe container storage.

ON SITE PACKING SERVICES

Our skilled professionals provide stress-free, customized on-site packing—including wrapping, boxing, and taping—tailored directly to your specific requirements.

HDPE TARPAULIN PACKING WITH LASHING

We supply durable, high-grade HDPE tarpaulin packing with lashing, customizable to your specific requirements for reliable cargo protection.
